---

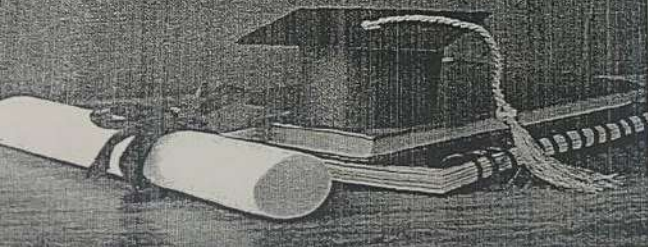

### Abstract

New Education Policy had launched on 29th July, 2020 where the government replaced the 34 years of old national education policy. Covid 19 put challenges in front of education institutions, where how much new policy go to reshape the need of the country, is wait and watch scenario. Offline teaching now converted into online. New software and new courses got into recognition which all opens new door to explore. The new education policy aims to change the nature and quality of School and Higher Education system in the country. The objectives of the study to estimate and analyse the areas where the policy has been proposed action but it look very unpredictable and shabby. A policy will never become successful without having well organised infrastructure. In this regard, this policy needs considerable change and its implementation in total reform in education system. Education is a Concurrent subject and its implementation of the proposal under NEP 2020 depends on the future regulation by the Centre-State and relationship. In all, this NEP has come in such a situation when the of reducing GDP in the world is a matter of great concern.
