ABSTRACT

The study of the research entitled “the study on financial position using different ratio of BHEL Limited” was based on secondary data from annual report of the company. Ratio analysis is critical for helping us to understand financial statements, for measuring the overall financial health of business and for identifying trends over time. Potential investors and Lenders often rely on ratio analysis for making lending and investing decisions. Soundness of any research depends upon the systematic method of data collection and analysis. Financial position of any company and its future can be analysed with the help of different ratios. The present study is based on ratio of last five years data, which was taken from company’s balance sheet. This study aims to not only develop an understanding of the concepts of financial ratios but also to provide the investors and other stake holder a practical insight into the application of financial ratios for decision making and control. It analyzes the financial statements of the company. The objective of the study is to Know the company’s performance of last five years, which will help the short term and long term investors.

Key words: Ratio analysis, public sector company and inventory.
