Employment Opportunities and Long-Term Development: A Case Study of the Mahatma Gandhi National Rural Employment Guarantee Plan in Jharkhand

Dr. Aftab Alam*

Abstract: *The present study is an attempt to evaluate and examine the selected Employment generation programs and long-term development: "Mahatma Gandhi National Rural Employment Guarantee Scheme" for the state of Jharkhand has been taken as a case study.*

The impact of the employment generation program and its long-term development on labour and employment as an opportunity and challenge in developing countries like India has been less satisfactory. MGNREGA is Government of India's one of the most ambitious and highlight-based grams which aim at social inclusion through the creation of productive assets as well as to enhance livelihood security by providing a guaranteed day of wage employment in one financial year to every household whose member are adult volunteer and agree to do unskilled manual work. On the Welfare of rural development by providing long-term development and employment generation programs and schemes for the unskilled labour of the rural sector.

Migration in Jharkhand has increased due to the lack of employment opportunities in the rural area.

*Assistant Professor, Faculty of Commerce, Karim City College, Jamshedpur.
